Art: HA0001

The product is made from original 500 denier CORDURA fabric and can also be made in 1000 denier upon request.

The cuts have been laser-made and are stitched with the MOLLE system.

Level 3 and Level 4 protective vests are equipped with both soft and hard ballistic inserts for optimal protection. They are reinforced with tightly woven polyamide 6.6 columns.

The inner lining consists of 60-density foam, reinforced to better absorb impacts.

The quick-release system is designed with polyurethane side buckles. When the upper buckles are pulled, the mechanism quickly activates, releasing the plastic side buckles.

This model is military-grade, fully designed for field operations.

Color

Art: HA0002

Product fabric: Original 500 denier CORDURA

Straps: 6.6 cm and 5.5 cm

Velcro: YKK, compatible with MOLLE systems

Length adjustments are made with straps at the front and back. Waist adjustments are made with Velcro side belts.

The inner lining is made of breathable foam, preventing sweating even during prolonged use.

Hard ballistic pockets are located at the front and back. The production color is military grey. The product is also available in black and beige upon request.

The vests are available in sizes M, L, and XL. Upon request, we can also produce in XXL and 3XL.

This vest allows for pouch customization with MOLLE columns available in four configurations: 8 laser-cut slots or 8 standard MOLLE straps, and 10 laser-cut slots or 10 standard MOLLE straps. It is compatible with H.A.P. and S.A.P. plates and is equipped with LIOR's unique weight distribution system for optimal back support. The vest also features a buckle system that allows for quick donning and removal. For added comfort, the 3D mesh lining ensures good sweat control, while the side and shoulder straps are easily and comfortably adjustable. Made from 500D and 1000D Cordura, it includes a tactical MOLLE system and shoulder straps with channels for cable management.

Color

The HAPRAX ARMOR Warrior is designed to provide maximum protection while remaining practical to use. With its integrated MOLLE system, it allows for customization by adding tactical pouches as needed. Its ergonomic design ensures a comfortable fit, even during intense movements. Lightweight and precisely constructed with laser-cut MOLLE, it guarantees excellent maneuverability and effective protection of vital areas.

HAPRAX

Art: HA0007

The vest is equipped with a 360-degree tactical MOLLE system, offering great flexibility for adding pouches and accessories. It opens and closes easily with a belt. Made from 500D and 1000D Cordura, it ensures high durability. The inner lining features 3D mesh, providing excellent sweat control for added comfort. The shoulder straps are quickly and comfortably adjustable. Additionally, a Velcro surface on the chest allows for the attachment of MOLLE elements. Pockets and pouches are available in both standard versions and for special operations.

Today's police officers and federal agents require a durable vest that meets their ballistic protection needs. The HAPRAX ARMOR Barakis is based on a common and popular model among many law enforcement professionals. It offers optimal comfort with waist adjustment via a belt and a fully MOLLE-equipped surface to accommodate tactical pouches. This vest is the preferred choice for officers due to its reliability and functionality.

HAPRAX

Art: HA0008

The vest features a laser-cut MOLLE platform on the front, back, and belt, which reduces weight while increasing durability. It has two quick-release belt buckles for easy donning and doffing. The rear drag handle extends up to 34 inches. Constructed from durable 500 denier Cordura nylon, the vest includes bottom-loading plate pockets compatible with 10 x 12 shooter's cut plates or SAPI cut plates. Two shoulder buckles allow for quick adjustments to achieve a perfect fit for the plate carrier. The 3D mesh padding on the front, back, and shoulder pads ensures ventilation and comfort.

The belt is equipped with 6 integrated pockets for M4 magazines, 2 pockets for inserting Banshee Elite 3.0 soft armor panels, and laser-cut MOLLE panels for attaching side plate pouches. A zippered administrative pocket on the front is designed for storing small field gear such as notebooks, pens, and multi-tools. On the back, a hydration pocket can hold a 2-liter reservoir, and vertical nylon straps are integrated for attaching QASM buckles for chest rigs. Loop panels on the front and back allow for attaching identification plates. The vest comes with a lifetime warranty.

The vest is made from 500 denier and 1000 denier fabric with laser-cut panels. Length adjustments are made using upper buckles, providing a precise fit.

It includes protection for the neck and arms, with 2.5 cm straps made from polyamide for enhanced durability. The interior of the vest is equipped with ballistic armor, ensuring optimal protection.

Color

Art: HA0012

This flexible rifle armor adapts and feels like soft armor while being certified for .223/5.56 and 7.62x39 calibers. It provides shock protection in compliance with NIH .06 limits of 44 mm, and is resistant to handguns, shotguns, impacts, cuts, punctures, and tasers. Rated at Level 3 by NIJ standards, it withstands impacts up to 65 Joules of force.

The 360° protection fully covers the front, back, and sides, offering unmatched extreme comfort on the market. It includes two extended low-profile pockets for additional rifle plates and side straps for optimal tactical comfort.

The MOLLE webbing, present on the front and back, is both traditional and laser-cut. A rear drag/rescue handle is available, with an optional name tag.

The vest comes with identification patches on the front and back and is adjustable at six points with two tactical comfort straps.

Stealth Fighter K9 Ballistic Vest Level IIIA - Size Large

The Stealth Fighter K9 ballistic vest provides Level IIIA protection for patrol dogs, with side panels, a chest plate, and shoulder straps capable of stopping all handgun ammunition. It features a breathable mesh lining and removable ballistic panels for easy cleaning. Available in black, coyote brown, and multi-cam, it fits dogs weighing 75 to 85 pounds, such as German Shepherds and Malinois.

K-9 Ballistic Vests NIJ Level II

These ballistic vests are lightweight, flexible, and certified NIJ Level II. They withstand multiple impacts, cuts, and sharp objects. The vests feature D-rings for leash attachment and come with two interchangeable Velcro identification panels. The ballistic nylon cover is easy to clean. The German Shepherd model weighs 8 lbs, and the Malinois model weighs 7 lbs. Adjustable to fit all sizes, they are made from 2" Mil-Spec nylon. The vests include a quick-lock buckle and use the same identification panels as the Elite K-9 patrol harness.

SOFT PANEL

Art: HA0026

Made from UHMWPE fabrics and utilizing special techniques, this panel is designed to be lightweight while offering Level IIIA ballistic protection according to NIJ standards. It features excellent weather resistance and easily integrates into various bags and plate carriers, making it widely used for personal protection.

Fully sealed, it is protected against liquids, chemicals, and other harsh elements, and requires no maintenance.

The Longfri soft ballistic panel has been tested to NIJ-0101.06 IIIA standards by H.P. White and Chesapeake. It can stop 9mm rounds traveling up to 1400 ft/s and .44 Magnum rounds at similar speeds, and is rated to withstand multiple impacts from selected threats.

This soft panel is ideal for use in plate carriers as well as various personal items such as school bags, laptop cases, and sports bags, providing everyday personal protection.

Check out our vests, plate carriers, and school bags to meet all your protection needs.

Size (Width x Length x Thickness) | Weight (lbs) | Ideal Use

11" x 14" x 0.35" | 1.35±0.1 | Front and back plate, insertion into school bag, laptop case, sports bag, etc.

5" x 8" x 0.35" | 0.35±0.1 | Side plate

LEVEL IV AL203 PLATES

These plates are made from a PE/Ceramic composite, making them lightweight while providing Level IV protection. The ceramic coating covers the entire plate, ensuring high ballistic performance and crack resistance.

Designed to conform to the body's curve, they maximize safety and comfort, allowing unrestricted movement. Tested to NIJ-0101.06 IV standards, they can stop at least three rounds of .30 caliber ammunition. The standard size is 9.5" x 11.5" x 0.8", with a weight of approximately 5.5 lbs.

STRIKE FACE

LEVEL III+ PURE PE PLATES

Art: HA0028

These ballistic plates, made from pure polyethylene with special pressing techniques, are designed to be lightweight while providing Level III+ protection. Shaped to conform perfectly to the body's curve, they maximize safety and comfort with flexible edges that allow unrestricted physical activity.

Durable, reliable, and stress fracture-resistant, these plates are fully sealed to protect against liquids, chemicals, and other harsh elements, and are maintenance-free. Tested to NIJ-0101.06 III standards by H.P. Blanc and Chesapeake, they are capable of stopping rounds from 7.62x51mm M80 (M-14), 7.62x39mm MSC (AK-47), and 5.56x45mm M193 (M-16).

Available in multiple sizes, they can also be custom-cut to fit any specific shape or size.
